Golf Club Fitting

What is a golf club fitting and how does it work?

A golf club fitting is a one-on-one, data-driven session with a Club Champion Master Fitter that identifies the exact club heads, shafts, length, loft, lie angle, and swingweight that help you play your best golf. The process is brand agnostic and uses the latest golf technology — including TrackMan 4 and the Club Champion AI Fitter Co-Pilot — to test real components in real time rather than relying on generic recommendations.
