Golf Club Fitting

What happens during a golf club fitting?

A Club Champion fitting starts with a conversation about your game and goals, a warm-up, and baseline data collected from your current clubs. From there, your Master Fitter — working with the Club Champion AI Fitter Co-Pilot and access to 65,000+ club combinations — tests shafts first (length, weight, bend profile), then matches the ideal club head to that shaft. You leave with your full fitting data and exact build specifications (component, length, loft, lie angle, swingweight, grip size), and there's no obligation to purchase. See the full fitting process breakdown for more detail.
