Driver Fitting

What happens in a driver fitting?

A driver fitting follows Club Champion's core fitting process: a conversation about your game and goals, a warm-up, baseline data from your current driver, then shaft testing (length, weight, bend profile) followed by club head matching — all guided by your Master Fitter and the AI Fitter Co-Pilot across 65,000+ combinations. You leave with your full specifications and no obligation to purchase.
